User Guide

1. Open the application.
2. Complete the sign-in step if authentication is enabled.
3. Open the main budget-planning area.
4. Enter the available budget and relevant spending information.
5. Review the calculated or displayed budget information.
6. Request an AI recommendation when the required information has been entered.
7. Read the generated recommendation and use it as planning guidance.
8. Repeat the process for another budget scenario when required.

Maintenance & Future Enhancement

Future versions can improve personalization by retaining appropriate user preferences.

The recommendation interface can be expanded with clearer category summaries and more structured output.

Additional validation and automated testing can improve reliability.

The interface can be made more responsive for different screen sizes.

Additional analytics or visualization features can be considered if they fit the project's final scope.
